Sottolavabo pesante

caratteristiche IMPORTANTI sottolavabo

403 - 404 - 405 - 406 - 411 - 413 - 523 - 524

- A) elevato diametro ingresso acqua (9mm)
- B) elevato diametro uscita acqua (9mm)
- C) elevata corsa di apertura (6mm) per avere un ottimo passaggio d'acqua
- D) doppia OR di notevole dimensione che forma una camera lubrificata stagna che garantisce una maggiore durata
- E) movimento di apertura e chiusura non immerso nell'acqua ma esterno per evitare fenomeni di bloccaggio a causa dal calcare

Tutte le parti in contatto con l'acqua sono in ottone a basso contenuto di piombo (CW617N)
Tutte le guarnizioni sono in NBR alimentare (FDA 177.2600)

IMPORTANT characteristics angle valve

403 - 404 - 405 - 406 - 411 - 413 - 523 - 524

- A) large diameter water inlet (9 mm)
- B) large diameter water outlet (9 mm)
- C) high opening stroke (6 mm) for an optimal water flow
- D) Double OR with considerable size that forms a lubricated sealed chamber which ensures longer life
- E) Opening and closing movement is not in, but outside of the water to avoid stiff operation due to limestone build-up

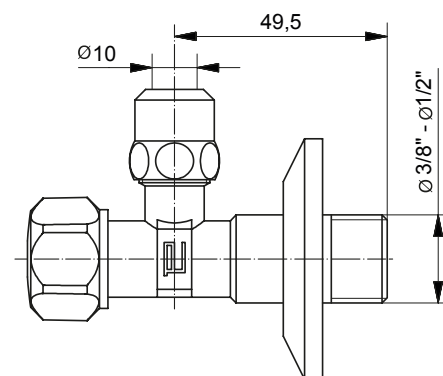

All parts in contact with water are made of brass with low lead content (CW617N)
All seals are made of NBR for food use (FDA 177.2600)
